AudioSonic

2011

With the AudioSonic assortment we make quality available for everyone. The assortment consists of only appealing and user friendly products for a fair price. We are guided by our philosophy; Quality shouldn't be a luxury. With this conviction in mind we try to identify the latest trends and developments and translate them into high quality products, making them available for everyone.

In September of last year, AudioSonic became part of Tristar. It was in this same month we introduced you to the AudioSonic assortment. From day one the reactions were positive and we have booked very good results. We now proudly present our new catalog.

What can you expect from AudioSonic this year?

With great care we have renewed several product ranges and made some additions in the form of new product categories. With these changes we continue to meet the trends and developments in the market.

We have extended our assortment with portable DVD players, retro radios and a range of headphones. These products make a logical addition to the assortment. Their attractive designs and fair price fit the AudioSonic philosophy perfectly.

You will find that improvements have been made to our ranges of televisions and alarm clocks. Our television range consists of LED and LCD + DVD models. Small designs. Full of unique features. All models in our range are suitable for both 230V and 12V, making them perfect to use on the boat or at the camping. We have a DVB-T version available for all models.

Our range of alarm clocks now offers various designs and features including an iPod docking station with charging function and several models with projector and hand sensor.

The AudioSonic assortment has become more complete. We would like to invite you to turn this page and have a look.

Sincerely,

Wout Jan Wessels Boer
Managing Director Tristar Europe B.V.

You can find the complete AudioSonic assortment online at www.tristar.eu
